Quigley's reputation is built on attention to detail. Above, swag valance over sliding glass door in crushed silk, Norton Shores.

Experts in the Newest Window Covering Technology

Quigley Draperies expert decorators are problem solvers, using the latest tech to address your decorating challenge.

Have a hard to reach window over the bath or in a high ceiling? A motorized solution may be just right for you.

Have a pet area that could use some help? Try one of the new fabrics that help neutralize odors or bacteria.

Want to see the view through that large living room window, but hate the sun's glare? Sun shades could be the answer.

Want to hide away the equipment in your new media room, or mimic in miniature your favorite movie house? Motorized curtains could be just what you need.

Quigley's experts are there to talk you through the options.

And, unlike other window decorating businesses, they'll still be around years from now if you ever need service.

The challenges of large windows are solved with Quigley's knowledge and experience. Above, over scaled Roman shade with Rollease hardware to handle the extra width, North Muskegon. Below, from transoms to skylights, height is no problem for Quigley's skilled installers. Tall side panels on decorative poles with attached valance and bullion trim add height and break the windows' horizontal line. Norton Shores.

Organdy sheer, multi level swag above transom window with iridescent trim, Spring Lake.

Remote control (left), Skyline gliding panels (middle) and coverings to fit any shape of window (right) are just three of the interesting alternatives available to customers today. Quigley's decorators can help you narrow down the multitude of options to find the right choice for your home.

Add wall to wall softness with Luminette privacy sheers. Muskegon.

Other window covering businesses, without their own custom workroom, can't offer the variety of innovative styles and fabrics Quigley Draperies is known for. Left, shaped overlay, two fabric valance over grass Roman shade on a French door, Muskegon.

Skilled, Local Help with Generations of Experience

When you come in to Quigley's showroom or schedule an in-home visit, you plug into generations of experience enhanced by up-to-date training in decorating trends and window covering technology. Quigley's salespeople are

decorators, so they are thinking about your windows, not a commission. Your friends, family and neighbors know – Quigley's know-how can help you dig through the myriad of choices to come up with a beautiful solution that fits your needs, style and budget.

The In-Store Workroom Advantage

Quigley's is the only area window covering business with its own, in-store workroom, where local, experienced seamstresses carefully craft your window covering. When that occasional adjustment needs to be made, Quigley's doesn't pack up your project for out of town shipping. The same experienced seamstresses work closely with your Quigley's representative to bring your window covering up to Quigley's exacting standards.

Quigley's people are accessible, unlike those businesses that only offer a phone number. At Quigley's, the person who installs your window coverings could be Greg Kroeze, one of the owners and a member of the family that has been making windows beautiful on the Lakeshore for many years. If you encounter problems years from now, Quigley's will still be here to call. Or, just stop in!

Local Purchases Spur the Local Economy

You see Quigley's people in local restaurants, at area events and in local churches. Quigley's children and grandchildren go to school with yours. Money sent out of state at the box stores seldom makes its way back to the Lakeshore, but money spent at Quigley's circulates back into your community, benefitting you and your family.

Come See Us

Quigley's isn't just a phone number, it's a comfortable showroom with displays that can spur your imagination. Come in and talk to us!

Quigley's isn't like window covering departments at box stores and chains. When you come to Quigley's you talk to decorators, not salespeople. Here, Window Treatment Specialist Carol (Kroeze) Beatty helps a customer choose a fabric that will coordinate with the colors in her home.

Bordeaux valance with rosettes over Luminette privacy sheers in bay window, with coordinating coverlet and decorative pillows, Bluffton Bay.

Top down, bottom up Roman shade in kitchen, Whitehall.

Corner installation with traversing (closing) drapery treatment, Madelyn valance variation, Mona Lake.

Overlay valance with bead detail over Matisse Silhouette shading, Harbour Towne.
